DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention claims a power system, causes no variation in output voltage during switching from a linear regulator to a DC-DC converter. The power system switches off a drive circuit of a DC-DC converter and supplies voltage to a load from a linear regulator if the load is light, while the power system halts voltage supply to the load from the linear regulator and switches the drive circuit of the DC-DC converter on if the load is heavy. During a set period of time after the load changes from light to heavy, the linear regulator continues to supply voltage to the load while the DC-DC converter supplies a pseudo feedback signal to a control circuit in place of a feedback signal, with the drive circuit left off to control the time ratio at switching elements and, thus minimizing output voltage variations. A power system is provided that outputs voltage to a load by switching between power devices. The power system comprises an inductor, switching elements for supplying input voltage to said load via said inductor, a drive circuit that generates a drive signal for complementarily performing on/off control of said switching elements at a predetermined time ratio, and a control circuit that switches said drive circuit on or off and that controls the time ratio at said switching

elements by a feedback signal based on said output voltage to the load, the power system being provided with a DC-DC converter for controlling said output voltage at a predetermined level, a pseudo-feedback-signal generating circuit that generates a pseudo feedback signal in synchronization with said drive signal of said DC-DC converter, and a series regulator that supplies said input voltage to the load after stepping down said input voltage. None of the cited art overcomes the claimed limitation of the instant application, since claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
